

# WHAT WE DO

The region's largest provider of cancer treatments, OHC offers patients a wide range of cancer specialists and the newest treatments and technologies.

Our physicians and nurse practitioners are leaders in their specialties, with the expertise and experience to treat nearly every form of cancer, including bone, brain, breast, head and neck, lung, skin and prostate cancers. We also specialize in the treatment of leukemia and many other forms of cancer.

## At OHC, you'll find:

- Medical oncologists/hematologists
- Radiation oncologists
- Gynecologic oncologists
- Neuro-oncologists
- Bone marrow/stem cell transplant specialists (Greater Cincinnati's only team for adults)

## We offer you the convenience of care at more than 20 locations that provide the following services:

- Chemotherapy infusions
- Radiation therapy, including specialized techniques such as MammoSite, stereotactic radiosurgery, high dose rate radiation and prostate seed implants
- Sophisticated imaging such as PET, CT and DEXA scans
- Robotic surgery for gynecologic cancers
- Prescription drug pharmacy services

# OUR APPROACH TO CARE

Your health care is personal. When you choose OHC, you'll have one doctor who will attend to and direct your medical care.

When your doctor is on vacation, or if you need to see another specialty physician within our group, you can expect the same personal attention and high-quality care from your doctor's OHC partners.

And for times when your needs can't wait until the next appointment, we have physicians on call 24 hours a day, seven days a week.

## Our patients also receive various types of care and assistance from other members of our medical staff. These include:

- Nurse practitioners: registered nurses with the knowledge and skill to diagnose and treat problems that may arise during your treatment.
- Nurse clinicians: registered nurses who administer your medications in the OHC office.

- Research nurses: registered nurses who work directly with your physician to coordinate your treatment if you participate in a clinical trial.
- Pharmacists: registered pharmacists who oversee the preparation of medications used as part of your treatment.
- Medical assistants: medical personnel who check you in with each visit to OHC. They are responsible for diagnostic test scheduling, assisting with procedures and drawing blood samples.

OHC wants to provide the best care possible to you and your family. Because the patient experience is important to us, we ask our patients to review how we're doing throughout their course of care. Please let us know how we can improve our services and make your visit as comfortable as possible.

# WHY OHC?

Our attention to both the science and the human aspects of cancer has made us a leading choice among both patients and their physicians.

Doctors refer their patients to OHC because of our expertise and resources. OHC is leading the way regionally in the care and services for patients with cancer or blood disorders.

**Patients choose us because of our professional experience, caring staff and high-quality, cost-effective and convenient care.** Our patients know that we will provide the most advanced care and treatment appropriate to their individual circumstances. But they also

appreciate our personalized approach and know that we'll devote the time needed to help them understand their care and treatment planning.

OHC's comprehensive clinical research program is another reason doctors refer patients to us, and why patients choose our services. Each clinical trial is designed to find new or better treatments and to evaluate the effectiveness of those treatments. Participation often provides access to new and more effective cancer therapies before their formal approval by the Food and Drug Administration (FDA).

## WHO WE ARE

OHC offers specialty care for cancer and blood disorders at more than 20 locations in Ohio, Kentucky and Indiana.

With more than 50 physicians and a staff of nurse practitioners, OHC provides medical and radiation oncology, gynecologic oncology, neurologic oncology and bone marrow/stem cell transplant services.

We also staff a dedicated research team with deep experience in clinical trials that offer our patients leading edge cancer therapies in their local community.

While we've grown in size and scope over the years, our mission has remained constant: **To provide high-quality, cost-effective and convenient medical care to our patients.**

### Recognition and Certification

We're proud of our certification in the Quality Oncology Practice Initiative Certification Program (QOPI) developed by the American Society for Clinical Oncology. QOPI certification recognizes oncology practices that achieve rigorous standards for high-quality cancer care. Also, The Joint Commission, a not-for-profit organization that accredits more than 19,000 health care organizations and programs in the United States, accredits our home care and laboratory services for meeting or exceeding national standards for providing the highest quality patient care.

## CONVENIENT CARE CLOSE TO HOME

When you choose OHC, you'll find a specialist close to home. Please contact our main office to discuss which office may be right for you.
